DHANUSH M C

Chennai-21 | +91 8754513497 | dhanushmc93@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 3 years of full-stack development experience, including 2 years in a high-growth startup and exposure within an MNC environment. Specializes in React.js, TypeScript, Node.js, Go, and MongoDB, building scalable web applications, REST APIs, and responsive interfaces. Hands-on experience delivering AI-powered applications – RAG pipelines, AI agents, MCP integrations, and LLM-driven workflows – into production.

PROFESSIONAL EXPERIENCE

Software Engineer II — Uniphore **Nov 2025 – Present**

- Supported Autonom8 (A8) and Uniphore products as a shared engineering resource following the acquisition, handling production issues, critical bug fixes, and feature development across both platforms.
- Implemented dynamic RAG support for A8, enabling integration and switching between multiple AI providers to improve AI-powered product capabilities.
- Developed a visual workflow automation engine in React.js with triggers, chat triggers, AI agent nodes, code nodes, and custom nodes for configurable workflow creation and execution.
- Built reusable React.js workflow and chat packages with custom node versioning, publishing, and Semantic Release for automated package management.
- Developed backend integrations using NATS messaging between workflow services; contributed to agent memory and task management for AI-driven workflows.
- Collaborated across frontend and backend teams to integrate workflow execution, AI agents, messaging, and platform services, delivering scalable end-to-end functionality.

Software Developer — Autonom8 **Nov 2023 – Nov 2025**

- Developed features for Autonom8, a low-code workflow platform, using React.js, Node.js, PostgreSQL, Docker, Tailwind CSS, and BPMN/Camunda to build dynamic forms and end-to-end business process journeys.
- Built and integrated microservices and reusable platform packages, including a database/data storage package, improving platform modularity.
- Developed an AI-powered code review feature and implemented RAG-based customer chat to analyze code, identify issues, and provide context-aware product information.
- Collaborated within a 5-member engineering team, mentoring junior developers on implementation, architecture, and troubleshooting.
- Built Playwright automated tests for critical workflows; performed security and dependency vulnerability checks, including upgrading applications from Node.js 12 to Node.js 18.
- Optimized React.js frontend performance by reducing unnecessary re-renders, improving API request handling, and preventing repeated microservice requests for static resources.
- Worked directly with customers and cross-functional teams to troubleshoot production issues and deliver product enhancements.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, Go, Python
Databases & Tools: MongoDB, PostgreSQL, Redis, Git, Docker, NATS, EMQX
Testing: Playwright, Unit Testing, End-to-End (E2E) Testing, Test Automation
AI / LLM: RAG, MCP, AI Agents, Knowledge Bases, OpenAI, Google Generative AI, Claude, LangChain, n8n

PROJECTS

- **PAE** – Quiz platform for interactive, gamified quizzes (Kahoot-style), enabling real-time hosted quiz sessions. Live demo
- **Chennai-events** – Event management platform for organizing events and functions, handling customer discovery and bookings. Live demo
- **LMS** – Learning management platform for hosting and consuming online courses (Udemy-style).

EDUCATION

Master of Business Administration — Pondicherry University (2022–2024)
Bachelor of Commerce — Guru Nanak College (2019–2022)
